

Date	Route Name	Bus	AM Begin Mileage	AM End Mileage	AM Riders	AM Driver
------	------------	-----	------------------	----------------	-----------	-----------

B) For Date, use Date picker function and format the display to read DD-MM-YY in the field

C) There are 4 routes that operate on any given school day. Truck Plaza is assigned Bus 17, but other factors. This will be a dropdown combo box that will display available vehicles from the v

D) AM Begin Mileage is the odometer reading from the vehicle selected at the time the driver s programmer and just want to stateMy intention as to how I want this to operate. I need a way I do not want it to be overly complicated, but I think if we just leave that one set as does default becomes the default until it's changed again. If that makes sense.

E) And begin mileage should be. Addressed by looking at the route name and the bus number a event for that vehicle. So looking at it chronologically in date order. As an example, if June first its begin mileage was 10,000 miles Then we assign that mileage to the vehicle in the vehicles. to that, ask me and I can clarify. It will also set. the beginning mileage for that route for that day. reading, if you will, for the truck plaza route in order to calculate how many miles were on that from the database, then I don't think we need to make a complex calculation here. You decide that.

F)In the ending mileage column that. Completes the route for the AM portion. I'm just telling you this is currently done.

G AM numbers is a manually entered field that will indicate how many students rode on that bus
H Am driver is intended to be a drop-down combo box and it will list all of the available drivers. For
I Column I is the pm start mileage and it will complete the. Route for the day so the route consists
So for that date in the date box. A complete route day would be the AM and the PM portion put
images of the information that is contained and AM portion. that indicated for the PM portion.
willComplete the route for that date. They are mirror images of each other. The AM is the first

That is all I want for the routes tab. If you have questions and need clarification, please do not h
